

Notivus announced it has been selected by a Top 10 REIT

Notivus announced it has been selected to partner with a national multifamily leader to deploy its innovative vendor compliance program.

The operator, with over 70,000 apartment units will replace its existing vendor compliance provider with Notivus. The company selected Notivus because of its technology, high-touch service model, and the ability to automate manual accounts payable and operations tasks that are time consuming and costly.

Notivus extends its units under management to over 215,000 as it continues to innovate vendor management in multifamily.
